The amendment filed March 5, 2002 is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: the incorporation by reference of the parent applications and the insertions in the disclosure are new matter.

Applicant is required to cancel the new matter in the reply to this Office Action.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 89, 101, and 107 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 89, 101, and 107 are indefinite because it is unclear what further structure of the body is intended to be inferred by reciting a further function of the switch.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 85-89, 91-93, 95-101, 103-108, 110-112, 14, and 115 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Muncheryan.

See figure 4.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 85, 90, 93, 94, 97, 102, 104, 109, 112 and 113 are rejected under 35 U.S.C. 103(a) as being unpatentable over Muncheryan in combination with Vassiliadis et al. Muncheryan teaches a device and method of making as claimed except the pigment. Vassiliadis et al teach the desirability of employing a pigment in conjunction with laser application. It would have been obvious to the artisan of ordinary skill to situate a pigment on the applicator of Muncheryan, since this would deposit the pigment on the surface in use and produce more effective lasing, as taught by Vassiliadis et al, thus producing a device and method such as claimed.

Applicant's arguments filed December 29, 2003 have been fully considered but they are not persuasive. The arguments are not persuasive for the reasons set forth above.

The instant application is a Continuation of US Patent Application Serial Number 10/091,957 and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the parent application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action after the filing of a request for continued examination and the submission under 37 CFR 1.114. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR

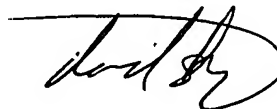

Art Unit: 3735

1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
